GRADING

Coin condition (grade) is described using the following scale, based on internationally recognised numismatic grading standards. Where a grade is separated by a slash (e.g. VF/XF), the obverse and reverse differ in condition – VF obverse, XF reverse in this example.

F	Fine	Noticeable, moderate to considerable wear across the design; major details, lettering and date remain clearly legible
F+	Choice Fine	Slightly better than Fine
F-VF	Fine to Very Fine	Between Fine and Very Fine
aVF	About Very Fine	Slightly below Very Fine
VF	Very Fine	Moderate wear on the higher points; major design elements and lettering remain sharp and well-defined
VF+	Choice Very Fine	Slightly better than Very Fine
VF-XF	Very Fine to Extremely Fine	Between Very Fine and Extremely Fine
aXF	About Extremely Fine	Slightly below Extremely Fine
XF	Extremely Fine	Light wear confined to the highest points of the design; most original detail and some mint lustre remain
XF+	Choice Extremely Fine	Slightly better than Extremely Fine
XF-UNC	Extremely Fine to Uncirculated	Between Extremely Fine and Uncirculated
aUNC	About Uncirculated	Slightly below Uncirculated
UNC	Uncirculated	Shows no evidence of circulation wear; retains its original mint lustre, which may appear naturally subdued with age
Proof	Proof	Struck specifically for collectors from specially prepared, polished dies on polished planchets, giving sharp detail and mirror-like fields. Refers to how the coin was made, not to its state of preservation
PL	Prooflike	A coin from the ordinary circulation production that happens to show mirror-like fields, usually from early strikes with fresh dies – it looks similar to a Proof but was not specially struck for collectors

Grading is inherently somewhat subjective. If you would like additional photos or have any question about a coin's condition before ordering, please contact us – we're happy to help.
